

Instructions: Texture Plates

FISKARS®

Dual-tip Stylus (Provides detailed, sharp edges) (5607)

1. Turn over the paper so the back side is up.

2. Trace the outline of the desired shape (do not fill in the shape) using either end of the stylus (smaller end will provide more precise trace).

3. Turn paper over to see your new texture.

In a pinch, a pen (with cap) or a popsicle stick may work in place of the stylus.

Texturing Tool (Covers area quickly) (12-5777)

1. Turn over the paper so the back side is up.

2. Apply pressure downward in circular strokes covering the pattern. (Careful, don't shift the paper!)

3. Turn paper over to see your new texture.

Tips:

1. Wax paper rubbed on work surface may help tool glide better.

2. Hold the texture tool "straight-up" to ensure best result.
